Jonathan Greenberg joins the Interoperability Institute as director of research and development

LANSING, Mich., Jan. 16, 2020 — The Interoperability Institute LLC has announced Jonathan Greenberg has joined the organization as the director of research and development where he will lead all research and development activities for the not-for-profit organization focused on developing innovative research designed to accelerate national health information technology interoperability.

Previously, Greenberg was the senior director of data engineering and management with IBM Watson Health. In this role, he was responsible for building and leading a newly formed team focused on next generation visual analytics.

Greenberg has extensive experience building high performing teams, designing and implementing new processes and innovating with data and analytics. In addition, he has a proven track record implementing artificial intelligence, natural language processing, organizational realignments and agile development processes.

Greenberg has been the subject of numerous articles regarding the value derived from implementing a successful visual analytics program at the *University of Michigan Health System* and has received awards from *Becker's Hospital Review*, *Health Data Management*, *Tableau* and *The University of Michigan Health System*.

“Healthcare’s digital transformation is at a critical juncture and technological innovation will help generate value from an ever-increasing mountain of healthcare data, which will also fuel the future of artificial intelligence,” said Greenberg. “I am excited to join the Interoperability Institute and be able to work at the crossroads of creativity and technology, which is my passion. I’m grateful for the opportunity to lead a team of accomplished developers.”

“We are delighted to have Jonathan join the Interoperability Institute,” said Mary Kratz, executive vice president, Interoperability Institute. “He is well equipped to carry out key business activities, in addition to enabling continuous innovation of the MiHIN suite of software product offerings.”

About Interoperability Institute

The Interoperability Institute focuses on creating communities and environments that accelerate the adoption of interoperability in ways that result in greater health and more impactful delivery of human services through developing solutions and the next generation workforce to enable organizations and communities to harness the benefits of interoperability at scale. The Institute is as a limited liability company with the Michigan Health Information Network Shared Services (MiHIN) as the sole member.
